The Moberly Monitor says the sur-veying party for the Burlington cutoff from Francis to Kansas City, which new line, is said to parallel the Wabash most of the way, will arrive in that town this week. The forerunpers are there now gathering up the necessary charts and maps of Bandolph county trying to find the best way for the location of that road through that county. The surveyors at this end of the Burlington are working on the line between here and Moberly and they say they will have it complete in about a week or ten days. There isn't any question but what the Burilogton intends to build a shorter route from Kansas City to St. Louis, also to connect the Iowa & St. Louis railroad through to its line. Hon. W. H. Kennan is home from Fulton where he attended the ex-Conpresent address of Thomas Patton, late federate reunion, and met many friends from all parts of the State.

Even if mercury and potash could cure Contagious Blood Poison the condition in which these strong minerals leave the system would make the "cure worse than the disease." But they cannot cure the vile disorder; they can only cover up the symptoms for awhile or mask the disease in the system, but as soon as the treatment is left off the hideous symptoms return. Mercury and potash est out the delicate lining of the stomach and bowels, produce chronic dyspepsia by drying up the gastric juices, cause the teeth to decay, and often completely break down the constitution, and where they are used in large quantities, the bones become affected, while the disease for which one has so long taken this destructive treatment has not been cused. Contagious Blood Poison is a disease it will not do to trifle with. It is a vile, dangerous and destructive disorder. When the blood becomes infected with its virus the mouth and throat ulcenste, hair and eyebrows come out, glands in the neck and groin swell, copper-colored spots appear on the flesh, and in severe cases sores break out on the body, the finger nails drop off and the sufferer is diseased from head to foot. S. S. S. is the only known antidote for Contagious Blood Poison—the one remedy that is able to get to the root of the disease and force out every particle of the poison so that there are never any signs of its return. It is purely vegetable, made entirely from roots, herbs and barks of known curative value. Instead of leaving bad after-effects as some medicines do, S. S. tones up every part of the system and puts every part of the body in perfect health. It will also remove any lingering effects of former mineral treatment while eradicating the poison from the circulation. Special book on the house treatment of this disease and any medical advice desired furnished free to all who write.
